## CAREER OBJECTIVE

To develop a career as a Software Engineer, aiming towards a Solution Architect role. Dedicated to continuously learning, approaching new technologies, and building optimal software solutions.

## SKILLS & TECHNICAL COMPETENCIES

**Programming Languages:** JavaScript, TypeScript, React, Tailwind CSS, SwiftUI, C# (.NET), Node.js, Python.

**Database & Infrastructure:** MySQL, PostgreSQL, Docker, Redis, Git, SVN.

**Concepts & Architectures:** Object-Oriented Programming (OOP), Clean Code, Clean Architecture, SOLID Principles, Design Patterns.

**Languages:** English - TOEIC 650 (Listening & Reading).

## EDUCATION

**Hanoi Architectural University**

**Hanoi, Vietnam**

*Bachelor of Information Technology*

2023 - 2027

- **Honors & Awards:** TOP 50 - TopCV Next Gen 2026 Young Talent Program; Third Prize in University Scientific Research.

## EXPERIENCE

**G-Connect Technology JSC**

**Hanoi, Vietnam**

*Fullstack Developer*

12/2025 - Present

- Developed scalable Frontend (ReactJS) and robust Backend features (ASP.NET Core) following Agile/Scrum, accelerating feature delivery by 20%.
- Designed 30+ RESTful APIs and optimized database queries, reducing average query response time by 35% and enhancing system performance.

**Rikai Mind (Subsidiary of Rikai Technology)**

**Hanoi, Vietnam**

*ReactJS Developer*

05/2025 - 11/2025

- Programmed dynamic Frontend modules utilizing ReactJS and TypeScript, improving application responsiveness and reducing page load time by 25%.
- Integrated external RESTful APIs and managed application state, contributing to a 15% increase in user engagement through optimized UX.

## PROJECTS

**Quality Management Agency: CTTL - Essay Grading System**

12/2025 - 06/2026

*Fullstack Developer*

- Developed a mock exam and essay grading system scaling to support 100,000+ candidates using C# (.NET), React-TS, MySQL, and Redis.
- Optimized the frontend framework and collaborated on system interactions, reducing UI rendering time by 20%.

**Quality Management Agency: TTN - National Mock Exam System**

12/2025 - 06/2026

*Fullstack Developer*

- Managed system deployment and performance optimization, successfully managing pilot exam sites for 400 - 800 candidates while ensuring 99.9% uptime.

**Commerceforce, Inc.: EC-Chatbot**

05/2025 - 11/2025

*Front-End / ReactJS Developer*

- Developed an embedded EC Chatbot for the Japanese market, successfully attracting new clients by building customized new features tailored to each client.
- Improved Hiragana to Kanji conversion systems, increasing text processing accuracy by 30% across mobile and web platforms.

**Freelance: App Manager**

10/2025 - 01/2026

### *Back-End & Front-End Developer*

- Engineered a configuration management service via CLI and successfully published a key rotation package to the npm registry using Node.js and TypeScript.
- Designed webhooks, triggers, and caching mechanisms using PostgreSQL and Redis to significantly optimize data flow and project performance.

### **Hanoi Architectural University: Blockchain Degree Verification App**

10/2025 - 06/2026

#### *Project Manager & Developer (Team of 4)*

- Led a research team of 4 utilizing blockchain and NFTs for university degree verification, successfully deploying the PoA consensus algorithm.
- Built the UI and management dashboard integrating MetaMask standards using Python and React-TS, ensuring 100% secure credential verification.
